

Our goal is to make Cobra Tech Academy @ Canyon Hills a middle school where parents feel secure knowing that teachers and staff support students in their pursuit of learning by using technological tools they love to find solutions to problems they want to solve in a collaborative environment built on the core values of *trust, respect, and responsibility*.

Cobra Tech Academy was established in the 2016-2017 school year with 140 selected 6th graders. This Program focuses on real-world projects in a technology-rich environment that promotes written and oral communication skills, collaboration, and critical thinking skills. 2017-2018 School Year we will have 140 7th & 6th Grade Students

APPLY TODAY!

New Tech Network's Success

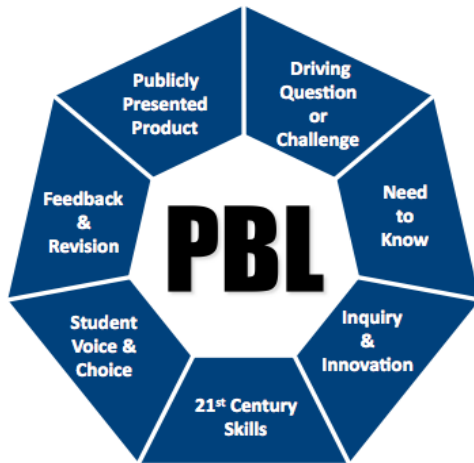

New Tech Network's 175 schools in 29 states and more than 15 years of experience partnering with schools in diverse settings across the country has taught them what students need to be successful in education and in life. NTN schools, 90 percent of which are in public districts, are built around student-centered projects that have real-world connections to local businesses and nonprofits. Digital tools are integrated into everyday learning: Instead of textbooks, students carry around laptops or tablets. When students graduate, they already have college credits under their belt. The network provides a "model of how to prepare students for the world they are coming into," says Linda Darling-Hammond, an education professor at Stanford University "because students master the top skills in demand in Fortune 500 companies today: teamwork, problem-solving, and interactive communication."

Cobra Tech Academy

Cobra Tech Academy (CTA) @ Canyon Hills Middle School provides opportunities for students to compete in an increasingly demanding society looking for 21st Century learners. CTA will prepare students to excel in global communities and communicate solutions to real-world problems; students will learn to communicate with multiple audiences using various technological platforms.

Why New Tech?

The El Paso Independent School District chose New Tech Network because we pride ourselves in leading the way for student success by constantly looking for ways to support students and provide opportunities that will prepare them to compete in a global community.

New Tech Network uses Project-Based Learning (PBL) to provide students real world experiences and opportunities!

The National Center for Education Statistic's most recent data shows that the national average in 2011-12 for high school graduation in four years is 81%. New Tech Network students' four-year graduation rate of 93% is well above the national average. If you want education that is *engaging, empowering, and on the cutting edge*, look no further than Cobra Tech Academy, a New Tech Network school.

Cobra Tech Academy @ Canyon Hills

- **One-to-One Technology: Every student has a laptop.**
- **Core Values: Trust, Respect, Responsibility**
- **Pre-AP Course (s)/High School Credits in 7th-8th**

Why We Do This

Students need and deserve an education that will prepare them for life in a global world where boundaries no longer exist because technology goes beyond borders. Cobra Tech Academy commits itself to fostering students who are creative critical thinkers and productive citizens for the benefit of both the students and our community.
